**DID YOU KNOW?**

The current 9-1-1 equipment was installed in 1994. At that time, 9% of people in the U.S. had cell phones, most of which were "1G" and only offered voice calling services.

In the U.S. today, 110% of people have mobile devices, most of which are "4G" and offer calling, texting and mobile computing. That means there are more active phones and tablets than there are people!
